### **Vanuatu Operational Support Plan : Ambae Volcano .**

This plan has been produced in response to the increased volcanic threat on Ambae, and focuses upon the critical issues which must be considered for effective response and timely evacuation of communities under greatest threat. Whilst it is possible that the entire population of Ambae may need to be evacuated, the major emphasis of this plan has been focused upon the relocation of those community members located within the 10 Km radius of the volcano. Should a full evacuation be required, then it is highly likely that international assistance will be sought, and therefore the planning process should include discussions with the international community, and the formulation of policy and procedures to facilitate such support. High level political interventions will be required.

SOPAC CRP commenced the review of the Palau 1999 National Disaster Plan through the EDF 9 Project : Reducing Vulnerability in Pacific ACP States under Key Result Area 3 to support sustainable development in Palau. Given that the review could not be completed within the project time frame for EDF 9 which ended in December 2008, the progress in 2009 has been facilitated through other donor resources available under the CRP 2009 Work Programme. The review has been progressed thus far in 2 phases. A third phase will involve making the final amendments to the revised arrangements (through virtual exchange with the National Emergency Management Office) and possibly a follow-up visit and workshop with the Palau National Emergency Committee

**Recovery Action Plan : for Rendova earthquake and tsunami ; January 2010 ; Solomon Islands. Action plan for Rendova Island disaster**

Two earthquakes (6.5 and 7.2) struck near Rendova and Tetepare Islands some 88km SSE of Gizo, in Western Province on Monday 4th January 2010. Significant impacts were localised around the Southern half of Rendova Island. The village of Retavo was destroyed by a tsunami wave of 4.5 - 5m with a run up of 200 - 300m resulting in the loss of 6 households affecting 31 people. Nine other villages were impacted by the earthquake affecting a further 555 households. In addition major landslides had affected the gardens and livelihoods of the 561 affected households. Recovery Action Plan was formed for the response to the communities of Rendova

**Cyclone Pat : Recovery and Reconstruction Plan 2010 - 2011 ; Aitutaki, Cook Islands**

Tropical Cyclone Pat passed through the Southern Cook Islands in the early hours of 10 February 2010 (Cook Islands time), and Aitutaki island was seriously affected. At its height Tropical Cyclone Pat was classified as a category 3 cyclone bringing destructive wind gusts of over 100 knots. On 10 February the Prime Minister of the Cook Islands declared a 'State of Disaster' for Aitutaki. In response to these severe impacts and following relatively successful relief efforts, the Government of Cook Islands moved to a 'recovery' phase with an emphasis on restoring the community of Aitutaki to a state of normality

**FSMC, Title 41. Public Health, Safety and Welfare - Chapter 7 : Disaster Relief Assistance Act of 1989.  
Disaster Relief Assistance Act of 1989**

Disaster Relief Assistance Act of 1989. The Congress of the Federated States of Micronesia finds and declares that a Natural and man-made disasters kill and injure people, disrupt communities and the workings of government, destroy and damage property, cut off income and cause suffering of other kinds; and due to the severe impact of disasters, the resources of the States are oftentimes inadequate to cope with them so that the States require the assistance of the National Government and other sources of available aid to restore devastated areas. Therefore the Congress of the Federated States of Micronesia intends by this chapter to provide for a permanent, orderly program of National Government assistance to the States and local governments in carrying out their responsibilities to alleviate suffering and damage which result from disasters

**Solomon Islands : National Adaptation Programmes of Action**

Solomon Islands is not only a Small Island Developing State (SIDS) but also a Least Developing Country (LDC). The country covers a total land area of 28, 785 square kilometres with an estimated population of 508,000 in year, 2007. It does not only have a small population but also is vulnerable to climate change impacts and susceptible to natural disaster occurrences. This NAPA is an attempt by the Solomon Islands Government to assemble the specific needs and special situations of the country. The NAPA prioritizes and ranks key sectors of the economy that requires urgent and immediate adaptation to solicit funding and enable technology transfer, consistent with Article 4.9 of the UNFCCC

#### **National Adaptation Programme for Action (NAPA) : Republic of Vanuatu**

The objective of the NAPA project for Vanuatu was to develop a country-wide programme of immediate and urgent project-based adaptation activities in priority sectors, in order to address the current and anticipated adverse effects of climate change, including extreme events. The project provided an opportunity to facilitate dialogue and consultations designed to identify and elaborate the immediate and urgent adaptation issues and appropriate activities, by conducting a comprehensive assessment of the available and necessary information on Vanuatu's vulnerability to climate change and of the response measures to enhance the resilience of the most threatened parts of Vanuatu's natural heritage, society and economy

#### **Drought response plan for South Tarawa**

This document outlines the methodology for determining the level or severity of drought condition for South Tarawa, Kiribati. It also outlines the Government of Kiribati (GoK) institutional arrangements for the nomination of each of the three drought alert levels and for a Declaration of Drought. The methodology provides a definition of drought, in the context of the South Tarawa water resources and identifies a procedure for alerting the required government and non-government stakeholders and community of the drought status. Enclosed in the following document is the drought response action plan (DRAP), which details the required actions by relevant GoK stakeholders, associated with the various drought alert levels

#### **Solomon Island Government : National Disaster Risk Management Plan**

The plan provides for the establishment of institutional arrangements for the Solomon Islands Government to address disaster risk management within the country. It includes both disaster management arrangements for preparing for, managing and recovering from disaster events and institutional mechanisms for addressing disaster risk reduction, including climate change adaptation. Arrangements are addressed at the national, provincial and local levels. It states that disaster risk management requires a policy consideration, in order to establish obligations and roles, set arrangements and accountabilities and to provide for national planning

**Standard Operating Procedures 2010 [Fiji NEOC]. Fiji National Emergency Operations Centre**

"Standard Operating Procedures" (SOPs) addresses the timing for those agencies and organizations which have key responsibilities for disaster response in close coordination with the central control body, i.e. the National Disaster Management Office. The National Disaster Management Plan provides directives to all agencies and personnel on the conduct of disaster preparedness and emergency operations. The SOP has been formulated in compliance with the National Disaster Management Plan of 1995 and the Natural Disaster Management Act of 1998. The SOP operationalises the policy directives and itemizes individual (agencies) responsibilities in an Emergency Operation Centre (EOC). Roles and responsibilities are clearly demarcated at both the individual and agency levels
