

# Information Management Jan 2009 Flood Operations

ANTHONY BLAKE  
FIJI NDMO

## The Event

- Onset:
- Flooding Duration:
- ISO:
- IDA/IRA:
- DSA:
- Close of Ops:
- # People Affected:
- \$\$ Relief:

## Fiji Disaster Assessments

- **Initial Situation Overview (0 – 24hrs)**
- **Initial Damage Assessments (48 – 72 hrs)**
- **Detailed Sector Assessments (1 week after)**

## IM Strengths

- **Use of IT/ GIS**
  - Website
  - Mapping
  - Computer based entries
- **CDMC/ CCG Briefings**
- **Support from Donors**
- **Inter-Agency Information Sharing**

## IM Challenges

- Availability of baseline data
- Verification of assessments
- Consistency of SITREPS
- Meetings
- Inconsistent Assessment Formats
  - More DSA rather than IDA

## IM Way Forward

- Baseline Data Access
- SOP's & Protocols
- Standard Reports – SITREP, etc
- Standard Assessment Formats
- Community Participation
- Resource Inventory
- Modified Cluster Approach (Philippines)
- Increased Training – EOC/ IDA

## END STATE

- The **RIGHT** Information
  - **NOT** ALL the Information
- HOW - Data into Information
- Community Participation
- Simple & Easy to use

QUESTIONS PLEASE.....

THANK YOU
