

## **UPDATE ON POWER RESTORATION WORK**

FEA wishes to advise its valued customers that it is doing its best to restore power supply to all the affected areas. FEA, in the process of restoring power supply to these affected areas, has to ensure that all the power lines and electrical equipments are thoroughly inspected and repaired, if necessary, before they are switched on and the power supply is restored. This measure is taken to ensure the safety of the members of the public and property.

Outlined below is the tentative power restoration program for the Central and Western Divisions of Viti Levu. However, the FEA will endeavour to improve on the program to ensure power supply is restored earlier than the tentative dates specified below:
